

SE edgeERP

Enterprise Solutions

EdgeERP solution integrates multiple departments of an enterprise and their data into an unified Information System (IS). The EdgeERP solution provides efficient data management to avoid duplication of effort and offers accuracy, timeliness and comprehensiveness of management information to the management.

EdgeERP solution, is the product of SourceEdge, is evolved over years on combined years of company's experience in building various business solutions for trading businesses related to retail sales & distribution. Implemented and used in several businesses, EdgeERP is a proven solution for enterprises to implement quickly and realize ROI. EnTrade helps enterprises to facilitate the administration and optimization of internal business processes efficiently; application uses single database and allows different departments to communicate each other through information sharing system. EnTrade system comprises organization function-specific components that are designed to interact with the other modules such as the Inventory, Accounts Payable, Accounts Receivable, Purchasing, Distribution etc.
